

# SIVA S

AI & Data Science · Python & Automation · Machine Learning · Data Analytics · ETL Pipelines

📞 8072861947 — ✉️ sivavpy2005@gmail.com — 📍 Tenkasi, Tamil Nadu, India — 🔗 linkedin.com/in/siva-sankaravel-400145323 — 🌐 github.com/Siva-S-05 — 🌐 Portfolio

## ABOUT ME

AI & Data Science graduate with hands-on experience building Python automation systems, ETL pipelines, ML applications, and REST API integrations. Skilled in data analytics, Power BI, SQL, prompt engineering, and AI-powered workflow automation. Passionate about delivering end-to-end data-driven solutions.

## EDUCATION

|                                                              |             |
|--------------------------------------------------------------|-------------|
| <b>B.Tech – Artificial Intelligence &amp; Data Science</b>   | 2022 – 2026 |
| P.A. College of Engineering and Technology, Pollachi         | CGPA: 7.42  |
| <b>HSC (Class XII)</b> – SMA Matric Hr. Sec. School, Tenkasi | 83%         |
| <b>SSLC (Class X)</b> – SMA Matric Hr. Sec. School, Tenkasi  | 92%         |

## SKILLS

|                             |                                                                                                     |                            |                                                       |
|-----------------------------|-----------------------------------------------------------------------------------------------------|----------------------------|-------------------------------------------------------|
| <b>Languages</b>            | Python, SQL, MySQL                                                                                  | <b>Visualization</b>       | Power BI, Tableau, Microsoft Excel                    |
| <b>Libraries</b>            | Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Selenium, Playwright, FastAPI, openpyxl, Requests | <b>Cloud &amp; De-vOps</b> | AWS, Terraform, Docker, GitHub Actions, CI/CD, Render |
| <b>AI &amp; Automa-tion</b> | Prompt Engineering, Claude AI, LLM Integration, JSON-LD                                             | <b>Tools</b>               | Git, GitHub, VS Code, Postman, Flask, Kaggle          |

## INTERSHIP EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |         |
